

# Pollak® | DESIGN MAKES THE DIFFERENCE

## Providing innovative designs, reliable manufacturing, and high quality parts since 1909

Pollak® has been providing innovative designs, reliable manufacturing, and high-quality parts for the heavy truck, off-road, RV, Marine, Industrial, and Towing Industries since 1909.

Manufactured in TS16949- and ISO14001-certified plants, Pollak® engineers, manufactures, and distributes a wide range of engine management and electro-mechanical products, including connectors, switches, sensors, and related items for the heavy truck, off-highway, RV, towing, construction, and agricultural industries. These products are utilized by original equipment manufacturers (OEM) and aftermarket distributors.

## Product Growth

Since acquiring the business, SMP has added multiple product lines to the Pollak brand, including a wide range of relays, coolant level sensors, and oil pressure switches. Additional products will continue to be added as the company increases its focus on the OE and aftermarket industries in the heavy truck, off-highway, RV, towing, construction, marine, and agricultural industries.
